1. A patient, who was admitted with acute on chronic systolic heart failure, developed cardiogenic shock with acute renal failure and acidosis. The patient became comatose and the physician documented “shock liver.” What is the correct ICD-10-CM code assignment for “shock liver with coma”?

2. The patient presented to the hospital with sepsis due to non-Candida albicans. Non-Candida albicans is a type of fungal infection, which can lead to a systemic infection, and can be resistant to antifungal agents. Assign the appropriate ICD-10-CM code assignment for sepsis due to non-Candida albicans.

3. The patient, who is status post bilateral mastectomy, was admitted for right pedicle latissimus myocutaneous flap and placement of bilateral tissue expanders. Assign the appropriate ICD-10-PCS procedure code assignments for a right pedicle latissimus myocutaneous flap and placement of bilateral tissue expanders.

4. In ICD-10-PCS, in the context of percutaneous lumbar vertebroplasty, the use of cement is considered a device.
   A. True
   B. False
   C. Maybe

5. A patient with a primary lung malignancy, who has been receiving ongoing chemotherapy, presents for prophylactic subcutaneous Neulasta injection to prevent infection. Assign the appropriate ICD-10-CM and ICD-10-PCS code assignments.

6. When Pitocin is administrated to a pregnant patient to induce labor, it should not be coded.
   A. True
   B. False

7. The patient was admitted to the hospital with leg and muscle weakness, paralysis and back pain. After diagnostic workup, the provider documented “acute inflammatory demyelinating polyneuropathy.” Assign the appropriate ICD-10-CM diagnosis code assignment for acute inflammatory demyelinating polyneuropathy.

8. The patient, who is status post coronary artery bypass graft (CABG), presents for treatment due to in-stent restenosis of a previously placed stent in the saphenous vein graft. A percutaneous transluminal coronary angioplasty was performed on the right coronary artery with deployment of a single drug-eluting stent. Assign the correct ICD-10-PCS procedure code for the angioplasty with drug-eluting stent placement.

9. The patient is admitted to the hospital for surgical treatment of a left buccal intraoral lymphatic malformation. She underwent excision of the lesion and grafting with Oasis® acellular matrix. Assign the correct ICD-10-PCS procedure code assignment for the placement of the graft consisting of Oasis® acellular matrix.

10. The patient is status post creation of ileal loop conduit due to transitional cell carcinoma of the bladder and kidney. A calcified polyp was found within the ileal loop conduit, and he underwent ileoscopy and excision of the polyp with cauterization at the base of the polyp. Assign the appropriate ICD-10-PCS procedure code assignment.

Coding Clinic

Continuing Education Quiz
Due on or before January 31, 2015

Instructions
Registered Health Information Technicians, Registered Health Information Administrators, Certified Coding Specialists and Certified Coding Specialists—Physician-based may earn one hour of continuing education credit toward AHIMA’s continuing education requirement by completing this test with a minimum score of 70%. This test is available to both personal subscribers and employees of institutions that subscribe to Coding Clinic. Complete the quiz, fill in information on both sides, and type or print clearly your name and mailing address in the space provided. Fold the insert on the dotted lines on this page, and mail to the following address:

Central Office on ICD-10-CM/PCS
Attention: Continuing Education
American Hospital Association
P.O. Box 92247
Chicago, IL 60675-2247

For your return address: Please type or print clearly the information within the dotted box below.

Name
Address
City/state/zip

Enclose check or money order for $20 (handling fee). Make check payable to the American Hospital Association. Do not send cash.

The quiz will not be graded and the $20 fee will be forfeited if the quiz is not postmarked on or before the date indicated on each test.

No credit will be given if the score is less than 70%, the test is incomplete, postmarked after the designated date, or submitted without the $20 handling fee.

Forms may be photocopied for use by directors of medical records or coding supervisors for assessment of coding staff’s understanding of topics presented in Coding Clinic.

Note: The Central Office on ICD-10-CM/PCS will not retain records of achievement. The practitioner is responsible for retaining the verification form returned by AHA and reporting the credit on AHIMA’s official continuing education reporting form.

Do not send the AHA verification form to the American Health Information Management Association.

Please duplicate your completed Continuing Education Quiz and retain the copy for your purposes.
