1. A patient presents with one mid-to-distal lesion in the left anterior descending coronary artery. The lesion was treated percutaneously with two drug-eluting stents. **Assign the appropriate ICD-10-PCS code assignment for the procedure performed.**

2. According to the official guidelines, the 7th character “A”, Initial encounter, is used for encounters after the patient has received active treatment of the condition and is receiving routine care for the condition during the healing or recovery phase.
   A. True  B. False

3. A patient presents for an audiogram and is found to have bilateral high frequency sensorineural hearing loss, as well as left-sided conductive hearing loss. **Assign the appropriate ICD-10-CM code assignment(s).**

4. A patient presents for transurethral treatment of a calculus of the left renal pelvis via ureteroscopy. The stone was initially fragmented by laser lithotripsy, and some of the remaining fragments were removed endoscopically by basket via the bladder. **Which of the following would be the correct root operation for the procedure performed?**
   A. Fragmentation  B. Extirpation  C. Extraction

5. A patient sustained a fall and ruptured the right patellar tendon and the left quadriceps tendon. An open repair with allograft of right patellar tendon and open repair with allograft of left quadriceps tendon was performed. **Assign the correct ICD-10-PCS procedure code assignment(s) for the procedure performed.**

6. A patient with basal cell carcinoma of the left lower eyelid and cheek along with orbital involvement presents for radical resection of the tumor. Surgery included orbital exenteration involving resections of the left eye, orbital bone, ocular muscle and eyelid. **Assign the correct ICD-10-PCS code assignment(s) for the procedure performed.**

7. What is the correct ICD-10-CM code assignment for hyperplastic polyp of the descending colon?

8. A patient with painful right total knee arthroplasty presents for revision of the arthroplasty. The previous components were removed and new tibial and femoral components were inserted and cemented into place. **Assign the correct ICD-10-PCS code assignment(s).**

9. What is the correct ICD-10-CM code assignment(s) for a patient diagnosed with acute liver injury, nontraumatic, as well as acute hepatitis, nonviral?

10. **When reporting the Glasgow coma score, can a total score be calculated if only individual scores are documented?**
    A. Yes  B. No

---

**No Credit Earned**

- □ Score not passing; less than 70%
- □ Test incomplete
- □ Fee not enclosed
- □ Submitted past due date
Instructions
Registered Health Information Technicians, Registered Health Information Administrators, Certified Coding Specialists and Certified Coding Specialists—Physician-based may earn one hour of continuing education credit toward AHIMA’s continuing education requirement by completing this test with a minimum score of 70%. This test is available to both personal subscribers and employees of institutions that subscribe to Coding Clinic. Complete the quiz, fill in information on both sides, and type or print clearly your name and mailing address in the space provided. Fold the insert on the dotted lines on this page, and mail to the following address:
Central Office on ICD-10-CM/PCS
Attention: Continuing Education
American Hospital Association
P.O. Box 92247
Chicago, IL 60675-2247

For your return address: Please type or print clearly the information within the dotted box below.

Name
Address
City/state/zip

Enclose check or money order for $20 (handling fee). Make check payable to the American Hospital Association. Do not send cash.

The quiz will not be graded and the $20 fee will be forfeited if the quiz is not postmarked on or before the date indicated on each test.

No credit will be given if the score is less than 70%, the test is incomplete, postmarked after the designated date, or submitted without the $20 handling fee.

Forms may be photocopied for use by directors of medical records or coding supervisors for assessment of coding staff’s understanding of topics presented in Coding Clinic.

Note: The Central Office on ICD-10-CM/PCS will not retain records of achievement. The practitioner is responsible for retaining the verification form returned by AHA and reporting the credit on AHIMA’s official continuing education reporting form.

Do not send the AHA verification form to the American Health Information Management Association.

Please duplicate your completed Continuing Education Quiz and retain the copy for your purposes.
