1. A patient with severe calf claudication developed an ulcer on the right foot, and was admitted to the hospital for percutaneous interventional procedure. Diagnostic angiography confirmed complete occlusion of the right superficial femoral artery, and he underwent balloon angioplasty using a drug-coated balloon with nondrug-eluting stent placement. **Assign the correct ICD-10-PCS code assignment for angioplasty of the femoral artery using a drug-coated balloon with stent placement.**

2. In ICD-10-PCS, the section X codes, seven characters are defined as section (X), body system, root operation, body part, approach, device/substance/technology, and qualifier. **A. True  B. False**

3. The qualifier value in section X codes specify an “old technology group,” which is simply a general indication of when (what year) the code was created. **A. True  B. False**

4. The patient who has had a prior CABG presents with unstable angina. He is found to have near total blockage of the saphenous vein bypass graft. Atherectomy is performed to remove severely calcified atheromatous plaque using the Diamondback orbital atherectomy system. The lesion is successfully crossed, balloon angioplasty performed, and an Endeavor drug-eluting stent successfully deployed. **What are the correct ICD-10-PCS code assignments for this procedure?**

5. A patient was admitted with bilateral occlusive peripheral vascular disease, and underwent percutaneous angioplasty with stent insertion. The left common femoral artery was treated with Lutonix drug-coated balloon (DCB) angioplasty alone, with good result. The right femoral artery was also treated using a DCB angioplasty catheter, followed by bare metal stent successfully placed across the lesion. **Assign the correct ICD-10-PCS code assignment for successful PTA using only a DCB angioplasty catheter and the correct ICD-10-PCS code assignment for successful PTA using a DCB angioplasty followed by bare metal stent.**

6. An infant, who had previously undergone modified Blalock-Taussig shunt surgery secondary to transposition of the great arteries and left ventricular outflow tract obstruction, presents for complete repair. The surgeon performed a Rastelli operation (ventricular septal defect closure using Gore-Tex baffle and right ventricle (RV) to pulmonary artery (PA) bypass with a Contegra valved conduit) after placing the patient on cardiopulmonary bypass. **Assign the correct ICD-10-PCS code assignment(s) for the procedure performed.**

7. A patient presents at 30 weeks for management of her gestational diabetes, which is being treated with oral meds. **Assign the correct ICD-10-CM diagnosis code(s) assignment for gestational diabetes that is controlled with oral medication.**

8. In ICD-10-CM, the 7th characters describing episode of care (initial and subsequent encounter) for Chapter 19 and 20 codes, can be assigned for home health visits. **A. True  B. False**

9. The patient who is status post repair of a left hip fracture is being followed up by home health care during the routine healing phase. The patient is receiving physical therapy services by the home health agency (HHA). **Which 7th character should the HHA report? A. A (initial encounter)  B. D (subsequent encounter)  C. S (sequela)**

10. The patient had a deep right lower quadrant stab wound of the abdomen and was being treated with a wound VAC® system while in the acute care hospital. After discharge, the home health agency provided wound VAC® dressing changes. **What would be the appropriate 7th character assignment?**
    **A. A (initial encounter)  B. D (subsequent encounter)  C. S (sequela)**

Instructions
Registered Health Information Technicians, Registered Health Information Administrators, Certified Coding Specialists and Certified Coding Specialists—Physician-based may earn one hour of continuing education credit toward AHIMA's continuing education requirement by completing this test with a minimum score of 70%. This test is available to both personal subscribers and employees of institutions that subscribe to Coding Clinic. Complete the quiz, fill in information on both sides, and type or print clearly your name and mailing address in the space provided. Fold the insert on the dotted lines on this page, and mail to the following address:

Central Office on ICD-10-CM/PCS
Attention: Continuing Education
American Hospital Association
P.O. Box 92247
Chicago, IL 60675-2247

Enclose check or money order for $20 (handling fee). Make check payable to the American Hospital Association. Do not send cash.

The quiz will not be graded and the $20 fee will be forfeited if the quiz is not postmarked on or before the date indicated on each test.

No credit will be given if the score is less than 70%, the test is incomplete, postmarked after the designated date, or submitted without the $20 handling fee.

Forms may be photocopied for use by directors of medical records or coding supervisors for assessment of coding staff’s understanding of topics presented in Coding Clinic.

Note: The Central Office on ICD-10-CM/PCS will not retain records of achievement. The practitioner is responsible for retaining the verification form returned by AHA and reporting the credit on AHIMA’s official continuing education reporting form.

Do not send the AHA verification form to the American Health Information Management Association.

Please duplicate your completed Continuing Education Quiz and retain the copy for your purposes.
