Coding Clinic for ICD-10-CM/PCS
Continuing Education Quiz 161-10
First Quarter 2016
Postmarked no later than September 30, 2016

First Quarter 2016

1. A patient had a completely normal delivery, except for an obstetric third-degree perineal laceration which was repaired. Assign the correct ICD-10-PCS code assignment(s) for repair of third-degree perineal laceration.

2. A pregnant patient, 13-weeks gestation, presents for anteversion of retroverted incarcerated uterus. During the procedure, the posterior wall of the uterus was pushed and the uterus was corrected bimanually. Assign the correct ICD-10-PCS code assignment for anteversion of retroverted uterus.

3. A 32-year-old patient, who is a type 2 diabetic, is admitted with a chronically infected ulcer of the left mid-foot. The provider documented, “Diabetic foot ulcer with skin breakdown, positive for Methicillin resistant Staphylococcus aureus (MRSA) infection.” She also had been diagnosed with polyneuropathy and end-stage renal disease (ESRD) on hemodialysis maintenance. Assign the correct ICD-10-CM code assignments for this case.

4. ICD-10-CM assumes a relationship between diabetes and osteomyelitis when both conditions are present.
   A. True  B. False

5. A 72-year-old patient underwent an emergency ileocecectomy. The patient’s stay was complicated by postoperative coagulopathy and intra-abdominal hemorrhage due to prasugrel and aspirin taken as prescribed prior to admission. Assign the correct ICD-10-CM code assignments for the acquired coagulopathy secondary to prasugrel and aspirin.

6. A patient with a history of stress urinary incontinence presents for pubovaginal sling placement. Assign the correct ICD-10-PCS code for this procedure.

7. Assign the correct ICD-10-CM code for a newborn diagnosed with a sacral dimple.

8. A patient presents with urachal mass, and underwent laparoscopic excision of the mass. At surgery, the urachus was dissected off at the level of the umbilicus and then dissected off the anterior rectus sheath all the way down to the level of the bladder. The bladder was filled with fluid and electrocautery was used to transect the urachal mass at the bladder level. Both the urachal mass and urachus were removed. Assign the correct ICD-10-PCS code assignment(s).

9. A 52-year-old patient is seen for upper endoscopic ultrasound (EUS) with fine needle aspiration biopsy. An ill-defined area of the common hepatic duct was sampled using ultrasound guidance. Assign the correct ICD-10-PCS code.

10. A 59-year-old patient presents for his yearly physical exam. The patient has preexisting chronic obstructive pulmonary disease (COPD). During the examination, the patient has complaints of shortness of breath on exertion, mucus production, and chest discomfort. The provider documented acute exacerbation of COPD. Assign the correct ICD-10-CM code(s) for the encounter.

No Credit Earned
   □ Score not passing; less than 70%
   □ Test incomplete
   □ Fee not enclosed
   □ Submitted past due date

   □ Personal
   □ Institutional (Specify institution if not part of the address) ____________________________

Verification
This is to certify that the person named above has earned one hour of continuing education credit by completing this test with a grade of 70% or better.
By: ____________________________________________  On: ________________
Instructions
Registered Health Information Technicians, Registered Health Information Administrators, Certified Coding Specialists and Certified Coding Specialists—Physician-based may earn one hour of continuing education credit toward AHIMA’s continuing education requirement by completing this test with a minimum score of 70%. This test is available to both personal subscribers and employees of institutions that subscribe to Coding Clinic. Complete the quiz, fill in information on both sides, and type or print clearly your name and mailing address in the space provided. Fold the insert on the dotted lines on this page, and mail to the following address:
Central Office on ICD-10-CM/PCS
Attention: Continuing Education
American Hospital Association
P.O. Box 92247
Chicago, IL 60675-2247

Enclose check or money order for $20 (handling fee). Make check payable to the American Hospital Association. Do not send cash.

The quiz will not be graded and the $20 fee will be forfeited if the quiz is not postmarked on or before the date indicated on each test.

No credit will be given if the score is less than 70%, the test is incomplete, postmarked after the designated date, or submitted without the $20 handling fee.

Forms may be photocopied for use by directors of medical records or coding supervisors for assessment of coding staff’s understanding of topics presented in Coding Clinic.

Note: The Central Office on ICD-10-CM/PCS will not retain records of achievement. The practitioner is responsible for retaining the verification form returned by AHA and reporting the credit on AHIMA’s official continuing education reporting form.

Do not send the AHA verification form to the American Health Information Management Association.

Please duplicate your completed Continuing Education Quiz and retain the copy for your purposes.
