
Coding Clinic for ICD-10-CM/PCS
Continuing Education Quiz 184-10
Postmarked no later than April 30, 2019
Fourth Quarter 2018

1. A 26-year-old patient is seen 10 days after the birth of her baby and is diagnosed with postpartum depression. **Assign the correct ICD-10-CM codes for this case.**

2. A 52-year-old patient with facioscapulohumeral dystrophy (FSHD) presents with chronic right shoulder pain and scapular winging. Due to the persistent and refractory symptoms, the surgeon performed a scapulothoracic fusion with iliac crest bone graft. During surgery, the surgeon fused the scapula to the underlying ribs. Bone graft harvested from the iliac crest was used as an autograft, and the scapula was wired to the adjacent ribs creating a stable platform. The bone graft was supplemented with some cancellous allograft croutons to increase its volume and was placed along each rib in the interface between the rib and scapula. **Assign the correct ICD-10-CM code along with the correct ICD-10-PCS codes for this case.**

3. A 46-year-old patient is admitted to the hospital due to altered mental status, gait imbalance and vertigo. The patient is diagnosed with an acute lacunar infarct and encephalopathy secondary to the lacunar infarction. **Assign the correct ICD-10-CM code(s) for this case.**

4. A 23-year-old patient was admitted with sepsis due to acute necrotic appendicitis with generalized peritonitis. **Assign the correct ICD-10-CM codes for this case.**

5. An infant, born via vaginal delivery in the hospital, is diagnosed with “microcephaly due to Zika virus infection.” **Assign the correct ICD-10-CM code(s) for this case.**

6. A 45-year-old female patient with locally advanced, unresectable stage III cancer of the body of the pancreas underwent laparoscopic irreversible electroporation to ablate the pancreatic tumor. **Assign the correct ICD-10-CM code along with the correct ICD-10-PCS code for this case.**

7. A 68-year-old patient with life-limiting claudication due to perivisceral aortic occlusive disease was admitted for thoracic aorta-to-femoral bypass graft. A left thoracotomy was performed and a graft was sewn into the descending thoracic aorta. Next, an incision was made in the left groin longitudinally and taken down to fascia. The common femoral artery was dissected out down to the bifurcation. A tunnel was created between the left groin incision and the left thoracic cavity. A polytetrafluoroethylene bifurcation graft was passed, and the graft was beveled and sewn end-to-side onto the left common femoral artery. **Assign the correct ICD-10-PCS code(s) for the thoracic aorta-to-femoral bypass graft.**

8. The patient is a 32-year-old female, gravida 3, para 2, who presents for delivery at 41 weeks of gestation. She is morbidly obese and received insufficient prenatal care. The provider documents “High risk pregnancy secondary to transverse lie. Because of these concerns, a high T incision cesarean section is performed. **Assign the correct ICD-10-PCS code for high T incision cesarean delivery.**

9. A 70-year-old male patient undergoes aquablation therapy for treatment of benign prostatic hypertrophy with urinary retention. **Assign the correct ICD-10-PCS code for aquablation therapy.**

10. A 51-year-old patient with a history of cirrhosis secondary to alcohol dependence was admitted for liver transplant surgery. The hepatectomy was performed on veno-venous bypass. Cannulas were placed in the right femoral vein and the portal vein. The cannulas were connected to the circuit, and veno-venous bypass was instituted at 2.5L per minute. **Assign the correct ICD-10-PCS code for the veno-venous bypass.**

No Credit Earned

Name: _____

Daytime phone number _____

Subscription Status:

- Personal
 Institutional (Specify institution if not part of the address) _____

- Score not passing; less than 70%
- Test incomplete
- Fee not enclosed
- Submitted past due date

Verification

This is to certify that the person named above has earned one hour of continuing education credit by completing this test with a grade of 70% or better.

Coding Clinic
Continuing Education Quiz
Due on or before April 30, 2019
Instructions

Registered Health Information Technicians, Registered Health Information Administrators, Certified Coding Specialists and Certified Coding Specialists—Physician-based may earn one hour of continuing education credit toward AHIMA’s continuing education requirement by completing this test with a minimum score of 70%. This test is available to both personal subscribers and employees of institutions that subscribe to Coding Clinic. Complete the quiz, fill in information on both sides, and type or print clearly your name and mailing address in the space provided. Fold the insert on the dotted lines on this page, and mail to the following address:

Central Office on ICD-10-CM/PCS
Attention: Continuing Education
American Hospital Association
P.O. Box 92247
Chicago, IL 60675-2247

FOLD #1

FOLD #1

Enclose check or money order for \$20 (handling fee). Make check payable to the American Hospital Association. Do not send cash.

The quiz will not be graded and the \$20 fee will be forfeited if the quiz is not postmarked on or before the date indicated on each test.

No credit will be given if the score is less than 70%, the test is incomplete, postmarked after the designated date, or submitted without the \$20 handling fee.

Forms may be photocopied for use by directors of medical records or coding supervisors for assessment of coding staff’s understanding of topics presented in *Coding Clinic*.

Note: The Central Office on ICD-10-CM/PCS will not retain records of achievement. The practitioner is responsible for retaining the verification form returned by AHA and reporting the credit on AHIMA’s official continuing education reporting form.

Do not send the AHA verification form to the American Health Information Management Association.

Please duplicate your completed Continuing Education Quiz and retain the copy for your purposes.
